

The anomalies on your facility — found, ranked, delivered on a 48-hour target.

Radiometric aerial thermal at 0.5°C across your rooftop, perimeter, and plant in one pass — delivered as a severity-ranked findings report your team puts straight into work orders.

THE DELIVERABLE

Not footage. Not a dashboard login. A geolocated, severity-ranked findings document — each anomaly classified against NFPA 70B and ASHRAE thresholds, with a recommended action and a 48-hour delivery target.

WHAT WE SCAN

Data centers · Energy grid · Perimeter security · Agriculture · Real estate · Maritime

WHY JINKI

- + Radiometric thermal at 0.5°C sensitivity — full array, single aerial pass.
- + Founder-led: CISSP, CCSP, AIGP, AAISM, AAIR; former cyber risk senior consultant at Deloitte.
- + \$5M liability per operation · mutual NDA before we see your site.
- + AES-256 at rest · TLS 1.3 in transit · on-premises processing available.
- + FAA Part 107 · authorized in the DC Special Flight Rules Area, where most operators can't fly.

THE FOUNDING ENGAGEMENT

Founding Scan — a single mission at founding-cohort terms: full facility pass, severity-ranked report on a 48-hour target, zero integration required. The entry point to persistent autonomous monitoring.
